AREAS OF EXPERTISE

Mr. Fraley has been involved in most aspects of the construction industry. Beginning in 1980, Mr. Fraley was involved in the subcontracting of interior divisions of General Contracting. He has had hands on experience in Drywall Assemblies, Acoustical Ceilings, various floor coverings and ceramic tile. Beginning in 1983, Mr. Fraley had worked his way to a manager's position working on projects throughout the south eastern United States as a Sub Contractor. With a strong work ethic and determination to grow in the construction industry, Mr. Fraley moved into a Superintendent position for a General Contractor in 1987 working on projects from Pre-engineered Buildings, Offices, Shopping Centers, Hotels, Motels, Churches and Schools.

In 2000, Mr. Fraley moved into a Project Managers Position. During this time, Mr. Fraley worked on various projects as a contractor and a Architects representative, from Multi-Family, Industrial, K-12 Schools, Collage and University's and design-build projects, from conception to completion, enhancing his, abilities in negotiation and communications thru proposal request writing and negotiation of the change orders, scheduling on projects with considerable scope of work in a condensed schedule, conducting various meetings and performing regular field and final inspections benefiting the outcome of the projects as well as the expectations of the owners.

Today, Mr. Fraley is in project management and estimating on various projects for The Walker Company.

PROJECT EXPERIENCE

A detailed list of project experience can be provided upon request. Project responsibilities include daily managing of equipment, labor, and subcontractors; managing schedules and budgets; providing technical support and documentation of the work performed; and coordinating work between the design team and the owner.
